

NADER MONTAZERI

Full-Stack Developer (React · Node.js · .NET) | Banking & FinTech

+44 7338 649026 · nmontazeri@yahoo.com · linkedin.com/in/nader-montazeri-0b19249a · Iran (open to relocation)

PROFESSIONAL SUMMARY

Full-Stack Developer and IT professional with 25+ years in IT and software, including full-stack development for banking and fintech as well as industrial, construction, and property operations. Builds React front ends, Node.js/Express and ASP.NET Core (C#) back ends, and Python services (FastAPI, Flask) on SQL Server, Oracle, and PostgreSQL. Delivers business-critical dashboards, transaction reporting, role-based access control (RBAC), SMS OTP authentication, and production deployments on Windows Server and IIS, backed by long experience managing IT infrastructure, networks, and user support. Open to relocation with company visa support; available immediately.

PROFESSIONAL EXPERIENCE

Full-Stack Developer | GreenBank

2024 – Present

Banking & financial operations · React, Node.js, SQL Server, Oracle

- Develop management dashboards for lending, digital wallets, investments, and daily banking operations with role-based access control (RBAC).
- Delivered wallet-document reporting for purchases, card-to-card transfers, PAYA, SATNA, and POL, integrating Oracle through SQL Server, with column-level filters, KPIs, and Excel export.
- Developed lending dashboards covering facility pipelines, borrower cash flow, failed payments, and management reporting.
- Built gold and silver investment dashboards and operational tools for offline settlement, HUB events, merchant data, account balances, fees, and fraud signals.
- Created an internal IT issue-management system with staff inboxes, assignment workflows, and tracking from submission to resolution.

Full-Stack Developer & IT Manager | Navard Company

2018 – 2024

Full-stack development · IT management

- Designed, built, and deployed full-stack business applications while managing IT operations, infrastructure, and user support; representative work is listed under Selected Projects.

Full-Stack Developer | E&E Software Co. (Kara va Asarbakhsh)

2016 – 2018

Full-stack web development · concurrent with Avacenter Complex role

- Designed, built, and deployed full-stack business applications; representative work is listed under Selected Projects.

IT Manager | Avacenter Complex

2016 – 2018

- Managed IT operations, infrastructure, networks, and user support for the complex.

IT Manager | Abadsazan Group

2004 – 2016

- Managed IT operations, infrastructure, networks, network security, user support, and internal business applications.
- Maintained Windows Server systems supporting daily business operations and led technical support.

- Designed, built, and deployed business applications; representative work is listed under Selected Projects.

SELECTED PROJECTS

Delivered during roles at Navard Company, E&E Software Co. (Kara va Asarbakhsh), and Supa Companies.

Online Meeting Platform

React · Node.js · Express · PostgreSQL · IIS

Virtual meeting platform for classes, meetings, and webinars with SMS one-time-password (OTP) login, virtual rooms, host permissions, subscriptions, and a Persian (Jalali) calendar, hosted on IIS.

Property, Construction & Building Management System

Operations platform for commercial buildings and complexes covering units, residents, debts, payments, and invoices, with manager, accountant, and resident roles and SMS notifications.

Attendance & License-Plate Recognition (Computer Vision)

Python · OpenCV · InsightFace · Flask

Face enrollment and live face recognition from kiosks and IP cameras for attendance, plus traffic logs and license-plate capture.

Finance & Billing Systems

ASP.NET · C# · SQL Server · Streamlit

Management reports, PDF and Excel invoices, digital signatures, and operational accounting; plus a standalone building-charge billing product for property and construction sites, separate from the property-management system.

Staff Performance Tracking

Performance-management tool with a work inbox, weekly plans, and group performance forms and reports.

TECHNICAL SKILLS

Frontend	React, JavaScript, HTML5, CSS3, responsive UI, reusable component-based interfaces
Backend	Node.js, Express, C#, ASP.NET Core, Python, FastAPI, Flask, Streamlit, RESTful APIs, web services
Mobile	Flutter, Dart, cross-platform mobile apps, backend API integration
Databases	Microsoft SQL Server, Oracle Database, PostgreSQL, database design, SQL query optimization, cross-database integration, reporting, Microsoft Excel
Security & Auth	Role-based access control (RBAC), SMS-based one-time password (OTP) authentication, SSL/TLS
Infrastructure	Windows Server, Microsoft IIS, SSL/TLS configuration, reverse proxy, production deployment, server administration
Computer Vision	OpenCV, InsightFace, face detection and recognition, license-plate capture
Domains	Banking, fintech, lending, digital wallets, payments (PAYA, SATNA, POL), gold/silver investment, fraud signals, billing, property management, industrial and construction operations

EDUCATION

M.Sc. Information Technology | Shiraz University

2011 – 2013

LANGUAGES

Persian (native) · English (professional working proficiency)
